FOR IMMEDIATE RELEASE

MGC Diagnostics Corporation Launches 'MGC Diagnostics Australia'

MGC Diagnostics, formerly Medical Graphics Corporation, is pleased to announce the launch of MGC Diagnostics Australia. This new entity enables us to better communicate to our Australian customers what we bring to market – leading edge CardioRespiratory Diagnostic Technology, a renewed dedication to product innovation, unmatched customer service and support, and an eye toward anticipating and solving unmet needs.

As part of our new strategy, we are pleased to introduce Ascencia Pty. Limited as our Service and Support Partner for the region. Ascencia will be responsible for the in-service as well as after sales support of all of our products.

We would also like to reassure our existing customers all active warranties and service contracts will be honored. Feel free to contact Ascencia directly with any queries regarding your warranty and/or service contract(s).

FOR SALES, PLEASE CONTACT:

MGC Diagnostics executed a public launch of its new identity at the European Respiratory Society Congress in Vienna earlier this month. This launch was well received by the respiratory professionals attending. We pledge to ensure MGC Diagnostics Australia is just as well received in Australia!

Finally, we wish to thank Mortara Instrument Australia for their support over the last decade.

Yours Sincerely,

Matt Margolies
