

# MGC DIAGNOSTICS: MANUFACTURED IN AMERICA

## ABOUT US

MGC DIAGNOSTICS IS THE ONLY COMPANY IN THE INDUSTRY TO MANUFACTURE A COMPLETE LINE OF CARDIOPULMONARY DIAGNOSTIC EQUIPMENT IN THE UNITED STATES OF AMERICA.

We manufacture a complete product line including spirometry, pulmonary function testing, body plethysmography, CPET (cardiopulmonary exercise) and indirect calorimetry. All other companies manufacture their products outside the United States or do not offer the same full line of diagnostic instrumentation.

**JUST ONE OF THE WAYS THAT MAKES US DIFFERENT**

## SO, WHY DOES THIS MATTER?

While some companies may be US based, their products are manufactured outside the US and then imported into the US. This means that service and replacement parts must come from overseas as well.

Other companies may be software houses only and have little influence or control over the hardware product they sell and what goes into them.

By manufacturing in the US, MGC Diagnostics has **complete control** of our product line, allowing us to provide “Best in Class” products, service and support.

## HERE'S THE THING:

Buying products manufactured in America and supporting American based manufacturing guarantees jobs for American workers, boosts American investment opportunities, and helps the American economy. The U.S. government encourages the purchase of products made in the USA. “The United States Government should, whenever possible, procure goods, products, materials, and services from sources that will help American businesses compete in strategic industries and help America’s workers thrive.”<sup>1</sup>

<sup>1</sup> President Biden’s Executive Order, January 25, 2021

## A FEW STATS:

**St. Paul, MN, USA**  
HEADQUARTERS

**26,000 sq ft**  
TOTAL WAREHOUSE SPACE

**13,000 sq ft**  
MANUFACTURING SPACE

## OUR STORY:

MGC Diagnostics has our roots in St. Paul, Minnesota, where we have manufactured our systems since 1977. We purchase all of our parts and supplies from local area vendors, whenever possible, with the emphasis on purchasing components from US companies.

Our simple approach has endured: Integrate the latest advances that today's technology affords, ensure accuracy through superior design, and then back up each and every product with consistently stellar support.

Manufactured in America is a source of pride at MGC Diagnostics. We are proud to manufacture our products in the USA, with American workers, and with American parts.

In 2021, we were notably named a Star Tribune Top Workplace, an honor awarded based on employee feedback.

We are proud to be able to provide to our customers products and solutions that meet their needs.

**WE DON'T JUST STAND BY OUR PRODUCT; WE STAND BY OUR CUSTOMERS, EMPLOYEES, AND COMMUNITY.**

Our roots are in  
St. Paul, Minnesota  
USA
